- Database administration of relational and NoSQL databases such as MongoDB
- Cloud administration with Docker swarm
- Bash scripts
- Git with Git Flow versioning framework
- Continuous Deployment (CD) and Continuous Integration (CI) with Bitbucket Pipelines
- Support

Qualifications

- Degree in computer science, commercial informatics, engineering, mathematics, physics (University, ETHZ, EPFL)
- Experience with a JavaScript framework such as Angular, React, Vue etc. and in working with relational or NoSQL databases
- An interest for microservices architecture and Docker containers
- 2 years experience as Developer
- Agile, Scrum and DevOps friendly

You offer

- Fluent in English and French or English and German
- Valid Working Permit in Switzerland
- Good interpersonal skills with team members and customers
- Willingness to travel (Switzerland)

We offer

- Competitive salary
- Individualized career path and good compensation package
- The startup challenge

Location

Zurich or Geneva
